Seeded Defects

Defect Number	Defect	Output Before Seeding	Output After Seeding	Suggested Corrections	Severity
1	Users can create an account with an invalid email.	Email not a correct email format	Proceeds to home page	Check for valid email with regular expression	1
2	Add event with invalid date	If an invalid date is added, you get "Invalid Date"	User can write an invalid date	Check for invalid dates	2
3	Can add a user to a group multiple times	If a user was already in the "toInvite" list, they shouldn't be able to be added to the list again	If a user was already in the invited list once, they can be invited again	Replace with typeahead	2
4	App doesn't redirect to https	If you type in "http://ucal-purdue.herokuapp.com" , it redirects you to "https://ucal-purdue.he	URL reads "http://ucal-purdue.herokuapp.com"	Add "app.use(sslRedirect());" to server.js	2

		rokuapp.co m"			
5	Able to add an event when some of the required inputs aren't filled out	The event name start and end date and time are required to create an event	An event can be created without setting a name	Add !this.eventNam e to [disabled] conditions	2
6	Go to settings page without logging in	Cannot access settings page without logging in first	Can access settings page without logging in	Add a AuthGuardSer vice to return a boolean to check whether you're logged in or not	2
7	Able to create an event where end time of event is before the start time	It would send an error saying you could have the end before the start	Now it will let you have an end date before the start	Have a check to make sure the end date is before the start	2
8	Update doesn't update the event name properly	Event name would be updated to the new name specified	Event name is no longer updated if the user tried to change the event name	Have a check to make sure the new event name value is being used and not the old one still	1
9	Decline still accepts a group invite	Group disappears after decline is clicked	Group is added to the user's groups	Send false to the server instead of true when the decline button is pressed	1
10	Update doesn't	Event description	Event description is	When sending the data to the	1

	update the event description properly	is updated	not changed	server to be updated include the description	
11	Update doesn't update the event location properly	Updates the location to the new one specified by the user	Server does not update the event object's location property to the new one	When updating the event information make sure that the new location value is being used and not the old one	1
12	Update doesn't update the event start time on the calendar of shared people properly	The start time is properly updated	The start time was the same as it was before	When sending the data to the server to be updated include the start time	1
13	Add users that don't exist to the list of group invites	The list of "toInvite" users is only filled with users that exist	The list of "toInvite" users is filled with users that exist and if they don't exist, they are added with a dummy _id	Replace the search box with a mandatory typeahead	2
14	Share a calendar with a user that doesn't exist	The list of "members" users is only filled with users that exist	The list of "members" is filled with users that exist and if they don't exist, they are added	Replace the search box with a mandatory typeahead	2

			with a dummy _id		
15	Invite all button only invites one person	Invites all the members selected	Now only invites one even if there are multiple	Remove "splice" from function call	1
16	When Day is selected, next button goes two days in advance instead of one	Upon clicking previous, when day is selected, the day on the calendar should be incremented one day	Upon clicking previous, when day is selected, the day on the calendar should be incremented two days	Remove nextfunction from calendar.component.ts and (click) on next button	3
17	When Day is selected, Previous button goes forward one week	Upon clicking previous, when week is selected, the days on the calendar should be back one week	Upon clicking next, when week is selected, the days on the calendar should be forward one week	Remove previous function from calendar.component.ts and (click) on previous button	3
18	id on settings page is wrong	It got the Users actual ID and displayed in on the page	Now there is a static ID that is always displayed	Grab the actual ID from the database	3
19	When adding a group, the "master" list	After a group has been created,	After a group has been created, the group list	Add "this.groupService.emitChange();" to	2

	doesn't update	the group list would update with the newly added group without refresh	would remain unchanged until refresh	group-detail.component.ts after the data has been successfully created	
20	When hitting "accept" on a group the "master" list doesn't update	It would update the group on the master list	Now it will not update the group on the master list	Make sure that you emit the change after saving	2
21	When clicking "Add Event", the start date appears one day ahead	Event start date appears correctly	Event start date appears one day ahead	Add the day number by the correct offset	3
22	When clicking "Add event", the end date appears one day ahead	Event end date appears correctly	Event end date appears one day ahead	Add the day number by the correct offset	3
23	When clicking "close" the data doesn't clear from the create event modal	Cleared modal whenever a user enters an event	Modal displays previous input that was inputted into event modal	Add clear statements after modal is closed or used	1
24	When clicking "close" the data doesn't	Modal was filled in even after clicking	Modal was filled in even after clicking shared	Add clear statement after modal is closed or used	1

	clear from the share modal	shared			
25	When selecting a date to create an event, the wrong year is displayed instead of the proper year	Correct year is displayed when create event is clicked on a specified date	Wrong year is put in instead of what the current year is	Make sure the year is not accidentally offset	3
